

MEDICAL FEE SCHEDULE UPDATE

1. The health pandemic associated with COVID-19 has resulted in the introduction of new CPT and HCPC codes. Accordingly, the IWCC has updated the medical fee schedule values for these new codes as reflected in the chart below:

2. The health pandemic associated with COVID-19 has also resulted in the need for social distancing, and the reallocation of resources (e.g., surgery suites, other medical space) normally reserved for other health care services. As a result of these extraordinary circumstances and the need to maintain access to care, telemedicine services have increased. The modifier -95 attached to designated codes allows for these services to be rendered via telemedicine. As listed below, the IWCC affirms those codes listed in Appendix P of the AMA CPT and **expands** the range of codes eligible for -95 assignment: designated by the green checkmarks (). The expanded use of modifier 95 is effective until further notice. Additionally, “distance” and “rural” requirements associated with telemedicine are suspended temporarily.

95 Synchronous Telemedicine Service Rendered Via a Real-Time Interactive Audio and Video Telecommunications System: Synchronous telemedicine service is defined as a **real-time** interaction between a physician or other qualified health care professional and a patient who is located at a distant site from the physician or other qualified health care professional. The totality of the communication of information exchanged between the physician or other qualified health care professional and patient during the course of the synchronous telemedicine service must be of an amount and nature that would be sufficient to meet the key components and/or requirements of the same service when rendered via a face-to-face interaction. Modifier 95 may only be appended to the

services listed in Appendix P. Appendix P is the list of CPT codes for services that are typically performed face-to-face but may be rendered via real-time (synchronous) interactive audio and video telecommunications system.
